HW 9

Due May 27, 2016

Problems: 5.5.{9, 20, 25, 31, 34, 38}

Problem Colley 5.5.9

Evaluate the integral

$$\int_0^2 \int_{x/2}^{(x/2)+1} x^5 (2y-x) e^{(2y-x)^2} dy dx$$

by making the substitution $u = x$, $v = 2y - x$.

Problem Colley 5.5.20

Find the total area enclosed inside the rose $r = \sin 2\theta$. (Hint: Sketch the curve and find the area inside a single leaf.)

Problem Colley 5.5.25

Evaluate

$$\iint_D \cos(x^2 + y^2) \, dA,$$

where D is the shaded region in Figure 5.106.

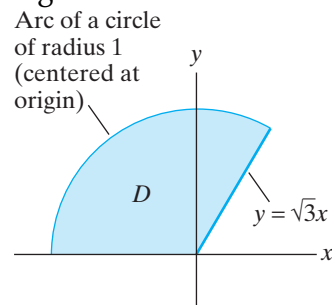

FIGURE 5.106. The region D of Exercise 25.

Problem Colley 5.5.31

Determine

$$\iiint_W (x^2 + y^2 + 2z^2) \, dV,$$

where W is the solid cylinder defined by the inequalities $x^2 + y^2 \leq 4$, $-1 \leq z \leq 2$.

Problem Colley 5.5.34

In Exercises 34 and 35, determine the values of the given integrals, where W is the region bounded by the two spheres $x^2 + y^2 + z^2 = a^2$ and $x^2 + y^2 + z^2 = b^2$, for $0 < a < b$.

$$\iiint_W \frac{dV}{\sqrt{x^2 + y^2 + z^2}}$$

Problem Colley 5.5.38

Determine

$$\iiint_W \left(2 + \sqrt{x^2 + y^2}\right) dV,$$

where $W = \{(x, y, z) | \sqrt{x^2 + y^2} \leq z/2 \leq 3\}$.
